

Announcement about Fake or Counterfeit Leadshine Products

After 20+ years' hard working since 1997, today Leadshine Technology Co., Inc. is one of the largest motion control manufacturers in the world dedicated to stepper and servo controls. Leadshine stepper and servo products have been trusted by thousands of global OEM clients in tens of industries. They have been successfully implemented in many applications such as CNC machinery, electronics, robotics, printing, packaging, etc.

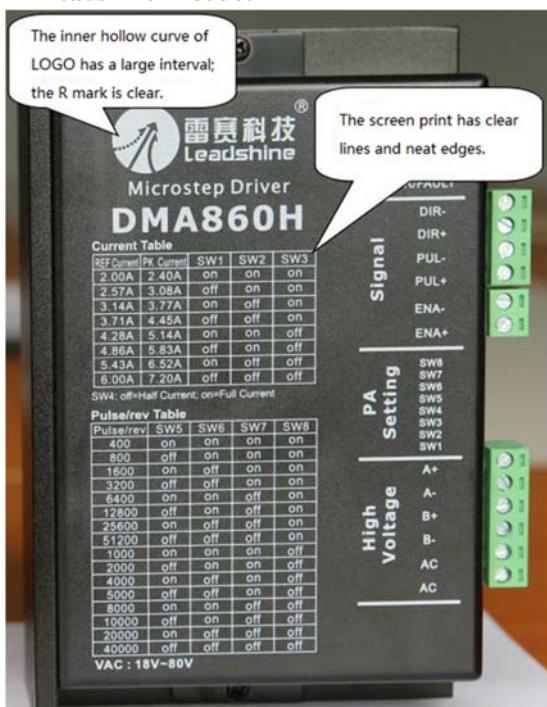

Due to Leadshine products' high quality & performance, high reliability, and high popularity, some small manufacturers/traders have broken the law and illegal making and selling fake or counterfeit Leadshine products. Those fake/counterfeit Leadshine products are frequently sold by those law-breakers mainly from their own webstores, but also from some popular online market places such as eBay, Amazon, Aliexpress, Alibaba, etc. Those fake Leadshine products perform miserable with very high failure rates. They have also caused huge potential safety issue for user life threat.

To protect the interests of Leadshine, its partners, and its customers, please ensure that you will purchase Leadshine products from: 1). Leadshine headquarters in China (www.leadshine.com); 2). Leadshine America Inc. in USA (www.leadshineusa.com); 3). Leadshine authorized distributors which can be at <http://www.leadshine.com/LeadshineDistributors.aspx>. In the case when your Leadshine product(s) came with a machine, check with your machine seller or Leadshine directly or Leadshine authorized distributors to find out whether or not they are authentic.

Leadshine will keep its legal rights to sue fake & counterfeit Leadshine product manufacturers, sellers, resellers, market places, buyers, users, etc.

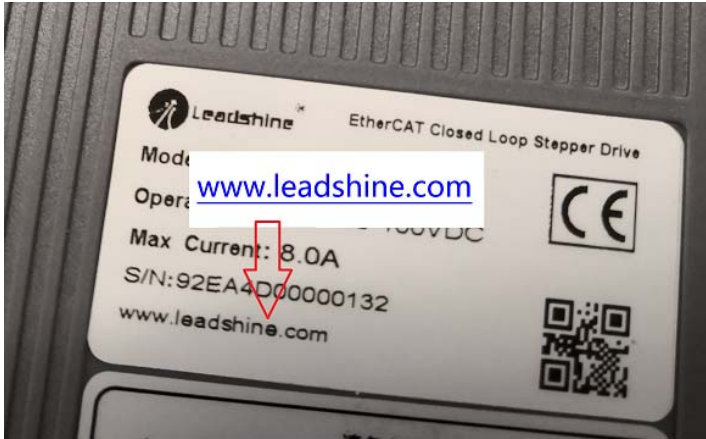

Here are a few examples for the differences between authentic products and fake/counterfeit products:
